## Commercial Floor Coating Products

### Slide-Lok Polyaspartic

A quick Cure Polyaspartic Polyurea that is used on residential and commercial applications. It is UV stable, no VOC's and is chemical resistant. This user friendly product is virtually odorless, has a high tensile strength and will flex with the concrete.

### Slide-Lok Patch Repair

Quick Cure Polyurea that was designed as a primer and a concrete patch material.

### Slide-Lok Moisture Barrier

Designed to soak into the concrete and crystallize, the concrete becomes harder and is sealed off from any moisture in or under the concrete slab. (This system is only required if the concrete is tested and shows over 6 pounds of moisture).

### Slide-Lok Joint Filler

A Polyaspartic Polyurea. UV stable, chemical resistant and comes in any color. It is flexible to accommodate small slab movement but strong enough to protect the vertical edges of concrete from sprawling under extreme loading. It is specifically designed for industrial floor applications that receiving heavy vehicle traffic such as forklifts and steel wheeled carts.

## Advantages

- One Day Application
- Does Not Yellow or Chalk
- Next Day Return To Service
- Environmentally Safe & Virtually Odorless (NO VOC'S)
- Excellent Adhesion To Concrete
- Superior Durability
